Specification

Handle
Zinc die casting

Plastic coated
Standard colours

black **SW** RAL 9005 
textured finish

black **SZ** RAL 9011 
silk finish

orange **OR** RAL 2004 

red **RT** RAL 3000 

silver **SB** RAL 9006 

chrome-plated **CR**

uncoated **RH**

Internal parts
Stainless Steel
German Material No. 1.4305

Stainless Steel
characteristics

Information

Adjustable hand levers GN 300.1 (photo page 203) are the result of modern industrial design incorporating a particularly handy shape in addition to ergonomic aspects.

All such levers have proved to be ideal whenever parts have to be clamped in a confined space or in a particular lever position. The centre insert is connected to the lever via serrations which can easily be disengaged.

Pulling the lever, disengages the serrations and allowing it to be swivelled to the ideal clamping position. On releasing the lever the serrations automatically re-engage.

Should a rotation of the lever through 360 degrees be impossible, the insert can easily be rotated by the hexagon in the screw (after disengaging the lever).
